

# Taltjänst

We are here to help you with your disability related to your voice, speech or language.

We are a free interpreting service for adults over 18 years old. *Taltjänst*, speech service, is part of Habilitering & Hälsa (Habilitation & Health) in the Region Stockholm organisation.

# Taltjänst offers communication support

You can use Taltjänst if you have problems with your speech, reading or writing or problems understanding when others speak. You still make your own decisions for your affairs; Taltjänst cannot advise you or help you make decisions.

## How can Taltjänst understand you?

- We get to know you and your way of communicating.
- We provide communication support based on your requirements and background, for example by adapting the language and using images.

# Which kinds of support can Taltjänst provide?

## **Speech support**

The interpreter clarifies what you say when necessary. The interpreter can also explain if you have problems understanding what someone else is saying.

## **Telephone support**

The interpreter is available during the telephone call. The interpreter will help you with the telephone contact and can clarify or convey what you want to say. The interpreter can take shorter notes during the conversation.

## **Reading and writing support**

The interpreter will help you fill out forms as well as read and write letters and emails. We can explain difficult concepts and write shorter notes.

We help you who have problems reading and writing based on language difficulties such as dyslexia or language disorder. We do not accept work from people with reading and writing problems based on cognitive or motor difficulties.

# Taltjänst can carry out assignments at different places

We can carry out assignments at your home, in our office or out in the community. We carry out interpreting assignments weekdays from 08.30 to 16.30.

Home

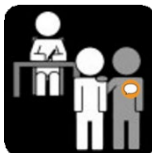

Office

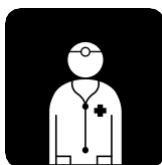

Community

Taltjänst can be involved in visits to, for example:

The bank

Healthcare

Authorities

## Good to know

You do not need a referral to avail of Taltjänst services.
